

Jason Liu, MD, MS

Dr. Jason Liu is a surgical oncologist and Assistant Professor at MD Anderson Cancer Center (MDACC) with a clinical focus on endocrine surgery (i.e., thyroid, parathyroid, and adrenal glands). He is also Adjunct Faculty at the Patient-Reported Outcomes, Value, and Experience (PROVE) Center at Mass General Brigham. His interest lies in the implementation of PROMs for performance improvement and value-based healthcare transformation. His work on the application of PROMs has been published in high impact journals, including *JAMA Surgery* and *NEJM Catalyst*. At MDACC, he works to harmonize and champion PROMs-related work across the system to improve patient-centered cancer care delivery and to influence national standards in multidisciplinary oncology care through evidence-based, patient-driven clinical excellence.
