

Lotte Haverman, PhD

Dr. Lotte Haverman is a distinguished medical psychologist and associate professor at Amsterdam University Medical Centers, the Netherlands. Her research centers on identifying barriers and facilitators to the use of Patient-Reported Outcome Measures (PROMs) in clinical practice, across diverse patient groups including children, adults, and parents. Her work involves developing and validating PROMs, as well as implementing optimizing methods for providing feedback to clinicians. One of her recent projects focuses on integrating PROMs into shared decision-making in the clinical setting. Dr. Haverman also serves as the director of the Amsterdam PROM Expertise Center and the KLIK PROM portal (www.hetklikt.nu), both dedicated to the real-world implementation of ePROMs.
